
JOHN OHARA

Profile

SQL Server database design and user interface design using MS Access, Visual Basic, Visual C# .NET, VBA, C, HTML, many more languages.

Migrated databases to SQL Server from MS Access and other sources.

Managed IT department including multi-platform web programmers and techs.

Very fast moving custom SQL Server reporting.

Experience

IT Manager - The Penn Warranty Corporation - Wilkes-Barre, PA - 2003 - Present
Built customer service, claims department and accounting applications with SQL Server databases and MS Access and Visual Studio front ends. Built all report generators and created custom reports including actuarial tables. Connected internal and external databases with web services. Very large Excel spreadsheets.

Programmer - Allied Services - Scranton, PA - 1999 - 2002

Created applications for financial planning and nursing departments. Data mining.

Audio Engineer – On Track Recording – Dickson City, PA – 1992 – 1999

Designed digital recording configuration of the studio. Recorded hundreds of CD albums and commercials. Worked with almost every imaginable type of person in high-stress, tight-deadline, emotionally-charged situations.

Education

University of Scranton - Visual Basic Certificates

Microsoft Office Certification

Skills

I built 95% of the entire customer service, data entry, claims department programs and reporting for The Penn Warranty Corporation. MS SQL Server backend and MS Access and Visual Studio user interfaces. Migration from separate MS Access databases without keys to relational SQL Server database platform. Generated over 1000 unique reports per month. Built check writers and multi-year aggregate actuarial table builders, RESTful web services. Designed and integrated the hardware infrastructure of Windows servers, Active Directory networking, gigabit switches, and Cat6 ethernet connections to workstations including firewalls and fiber switches.
